Automation

We combine complete systems. Please name your requirements, we'll search the most efficient and productive solution, we'll support during engineering and implement the drive, control and the software completely and according to your wishes.

We support centralized, modular, decentralized and hybrid automation concepts and are able to offer the most suitable control and visualization solution for every application.

Electronics

We enable efficiency and the best performance for complex and standardized applications with our electrical controllers, controls and converters for the power range between 0.2 and 315 kW. Select from different cooling types, safety functions and power classes and bring your machine in shape using our consistent communication concept for networked solutions.

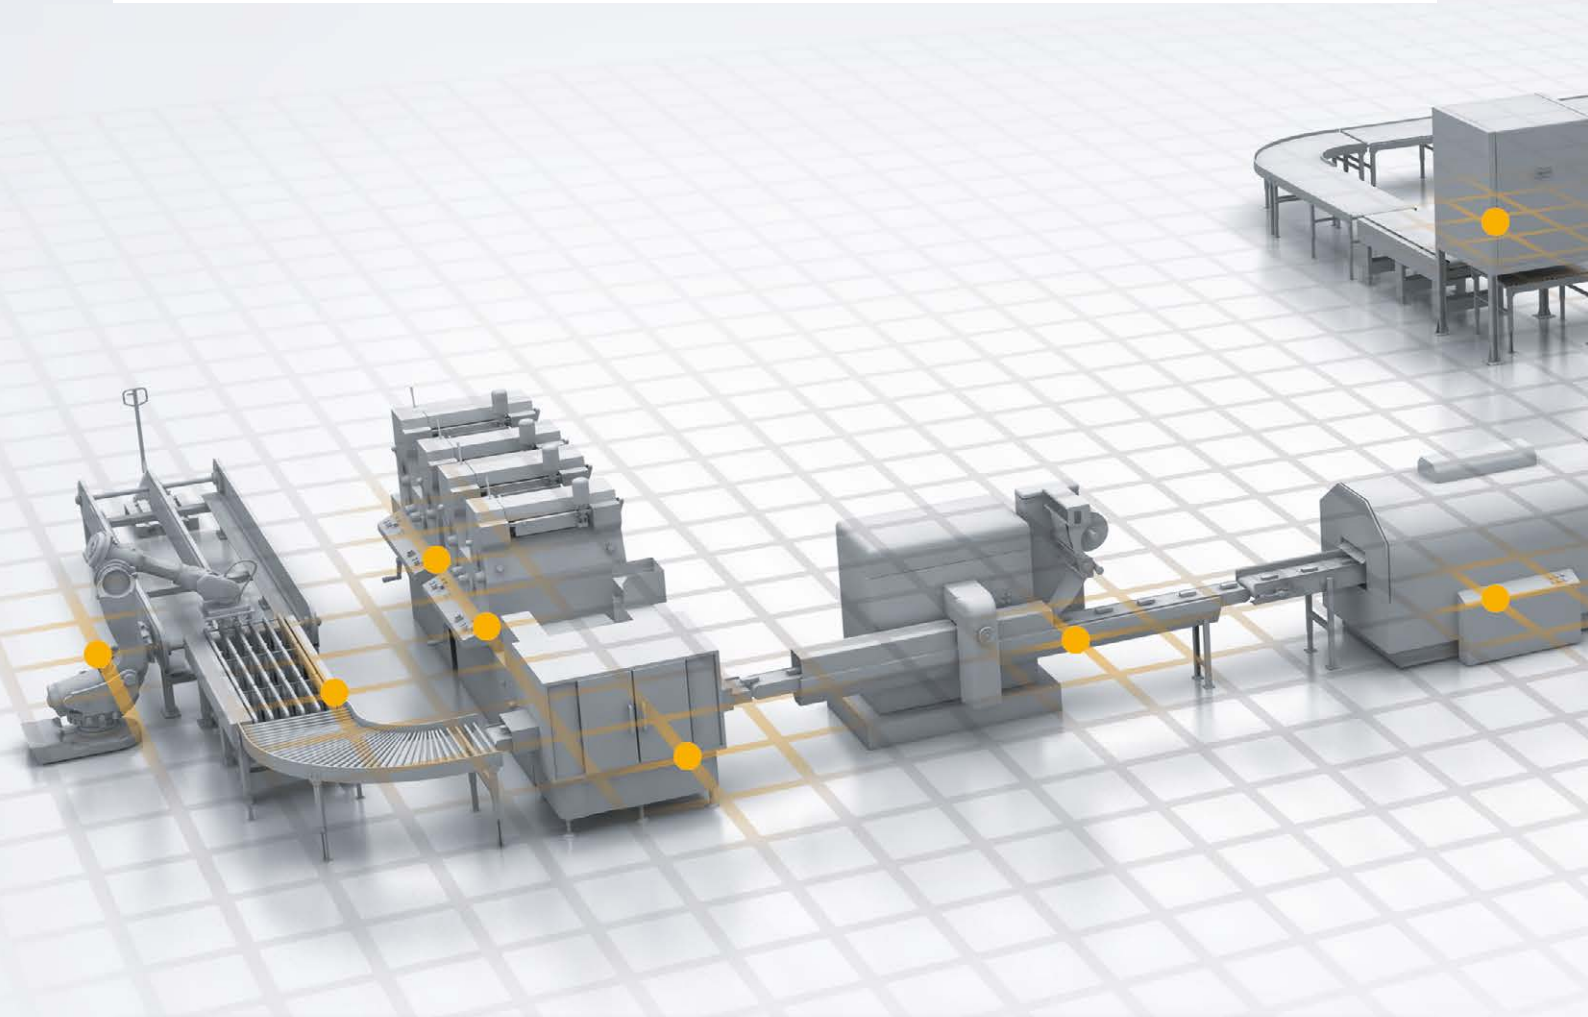

Motors

Are you searching for the suitable motor for your application? We offer a broad portfolio from 0.3 to 530 kW. Depending on your requirements, we provide your systems or mobile applications with linear motors, disc motors, dynamical three-phase AC motors, high torque motors and DC motors.

Baumüller at a glance

The comprehensive all-in-one package for your machines and installations: Lifecycle management of Baumüller

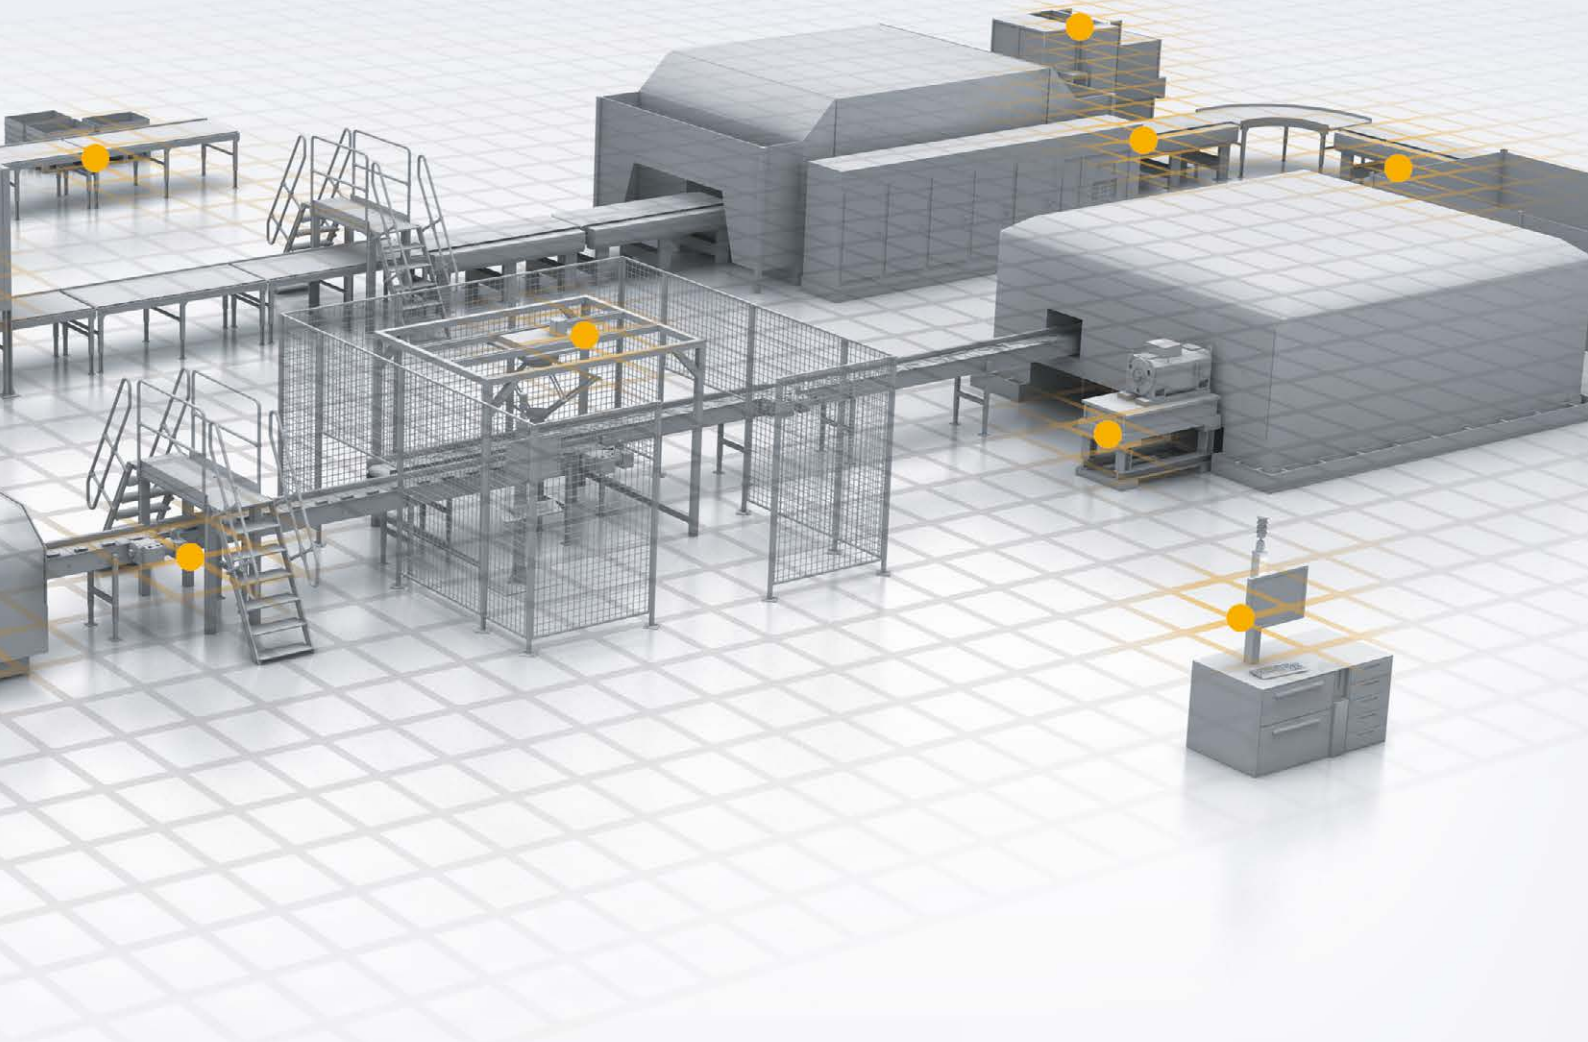

Engineering and switching systems

Service throughout the whole lifecycle: From the projecting and system design phase to engineering services, customer-specific switching systems and commissioning service. Throughout the whole life-cycle of your system we ensure the reliability and productivity of your machine by providing a wide range within the fields of commissioning, maintenance and retrofitting.

Sheet metal solutions

Our overall offer for your system is completed by individual metal solutions – from the machine covering up to the control cabinet – this way we offer maximum freedom in relation to the system design.

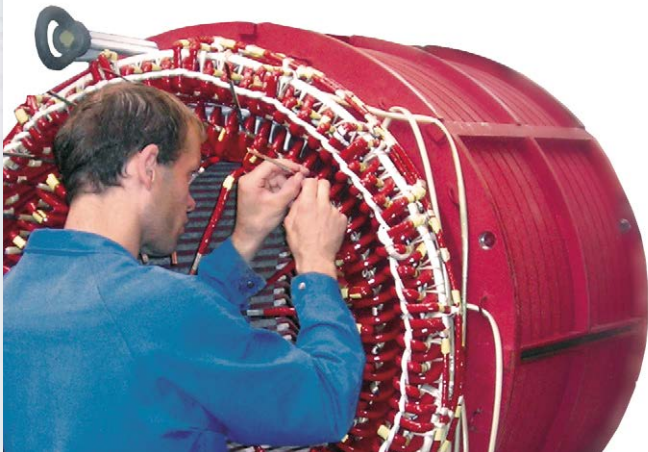

Mounting and relocation

We ensure your competitiveness by providing industrial mounting, relocation, commissioning, mechanical production, piping construction and special machinery – every day and throughout the world. We are intersectoral and flexible on duty and implement all project steps from planning to the final inspection for you with professional experts – and it doesn't matter if it's an individual machine or an entire company.

Services

Reactive, preventive and condition-based services are our speciality – manufacturer-independent and all around the clock. We offer the complete service spectrum – from repair and replacement of defect servo motors to the complete refitting of the entire electrical drive. We ensure efficiency, productivity and quality by using the most modern diagnostic methods and multiple retrofitting possibilities.

Electronic manufacturing service

As we are a competent partner for electronical services, we realize your entire process including project management, production, mounting, packaging, logistics and after-sales services.
