Customer information on the gas supply

November 25, 2022

With this letter, we would like to inform you that the companies of the Baumüller Group are only dependent on the gas supply to a small extent.

A potential interruption of gas supply would only affect smaller sub-areas, for which we have already developed alternatives.

We currently assume that any interruption in the supply of gas and accordingly any gas shortage would not have any impact on our production processes or on our range of services. We have already prepared internally for a wide range of scenarios. Our objective is to ensure smooth operating processes and integrated supplies to our customers even in the event of an interruption to the gas supply.

We have not yet been able to identify any effects of a possible gas shortage resulting in a change in supply in our supply chains. At the moment, this has no further impact on the situation on the procurement markets, which has been very tense for many months.

We will keep you informed of any future changes in the situation. We look forward to our continued successful cooperation with you.

Yours sincerely,

The Baumüller Group
